DETAILED ACTION

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because there are no section headings (e.g., "Summary of the Invention," "Detailed Description," etc.). Appropriate correction is required.

Claim Objections

Claims 4-20 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-20 have not been further treated on the merits.

Claim 1 is objected to because recitations of "the said" are redundant and should either be "the" or "said." Also note the 112 2nd rejection involving the recitation of "a said" below. Appropriate correction is required.

Art Unit: 3671

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The final phrase beginning with “or omitting” renders the claim indefinite because this phrase is not clearly linked to any of the structures. In other words, it is unclear if this phrase is intended to omit all primary members or only those on the smaller plates. Finally, it is unclear how “a said” primary member could be omitted when there is no specified number of primary members. This phrase has been treated with respect to the smaller plate.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Janesky (U.S. Patent 6,276,093) in view of Pate (U.S. Patent 6,116,813).

Janesky discloses a pair of cover plates (18, 20) having different sizes and arranged in juxtaposition (Figure 1), but is silent regarding strengthening members as claimed. Pate teaches arranging strengthening members (25, 26, 28, 30, 32, 34, 47) on separate plates in the manner

claimed (Figures 2 and 6). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the strengthening members of Pate with the plates of Janesky in order to strengthen the plates. Note that Pate includes fewer strengthening members on the smaller plate.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pate (U.S. Patent 6,116,813) in view of Janesky (U.S. Patent 6,276,093).

Pate teaches different sized cover plates (14, 46) having strengthening members as discussed above; however, the cover plates are not in juxtaposition as claimed. Janesky teaches juxtapositioned plates, as discussed above. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have positioned Pate in the manner of Janesky in order to suit a particular application.
